

DINGO PUNKS

 **MATH CHALLENGES**

MULTIPLICATION

Read the following word problem, then help Chef Gumbo answer the questions.

Chef Gumbo is famous for two things: his golden tooth made from a pirate's coin, and his love for all things greasy. Every weekend at Camp Calamari, he whips up some of his famous grease-cakes as breakfast for the campers.

On Saturday, Chef Gumbo made 12 pancakes and stacked them into a tall, soggy tower. Each pancake was made with 2 ounces of grease. He also made 4 grease-cakes, each one 6 times greasier than a pancake.

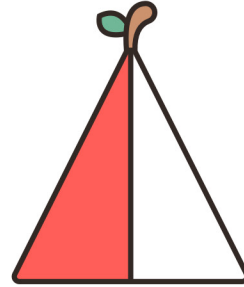

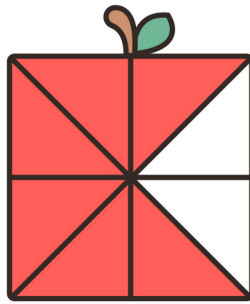

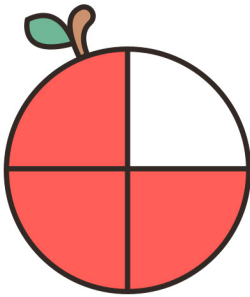

1. All together, how many pancakes worth of grease are in Chef Gumbo's 4 grease-cakes?

2. If the tower was made from 12 grease-cakes, how many ounces of grease would it contain?

FRACTIONS

Look at the fractions, then help Stefan Sage answer some questions.

“In the orchard, I’ve gone astray.
My apples grew in a funny way.
Circles, squares, and triangles, too —
what a weird tree I’ve turned into!”

1. What fraction does the circle show?

2. Which shape's fraction is the smallest number?

3. Which two shapes have equivalent fractions?

4. Add the circle's fraction to the square's fraction.

PLACE VALUE

Help Pippo Fizzlepop answer the questions about place value.

1.

$$245 + 829$$

2.

$$4 \times 900$$

3.

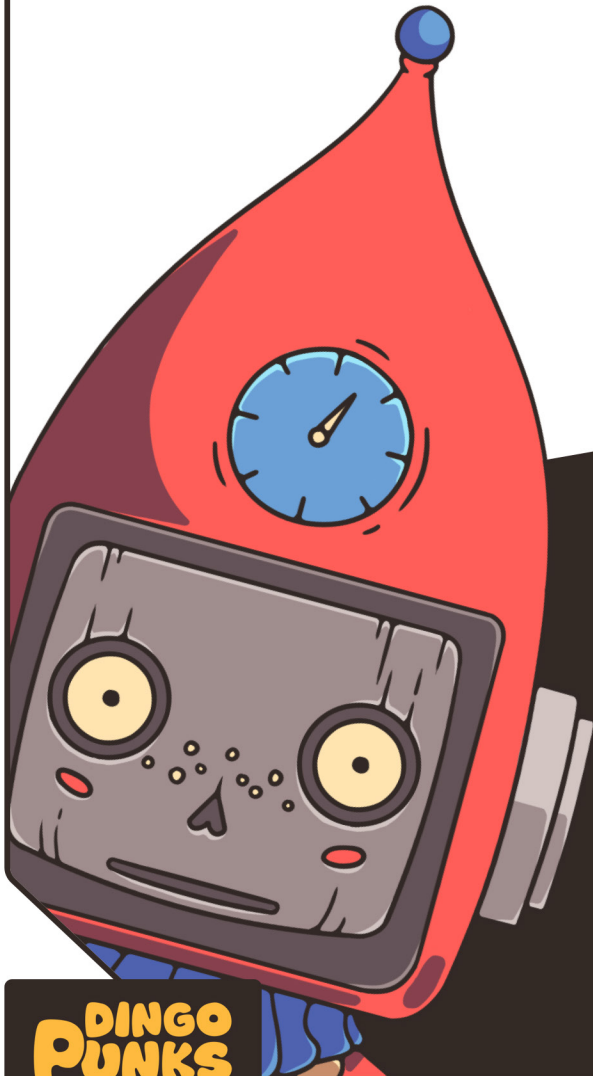

$$9,120 \boxed{?} 91,200$$

4.

535

5.

two hundred forty-five

1. What is the sum?

2. What is the product?

3. What symbol is used to compare these numbers?

4. Round this number to the nearest ten.

5. Write this number in expanded form.

MEASUREMENT

Read the following word problem, then help Sunny Snap answer some questions.

Sunny Snap is having a bad morning. It's her first day of leprechaun school, but all she wants to do is sleep in. She wasn't even given a map of the school — just dimensions!

- The cafeteria has a width of 30 yards, and a length of 20 yards.
- The office has an equal length & width, and an area of 100 square feet.
- The classroom has a width of 12 yards, and an area of 96 square yards.

1. What is the area of the cafeteria?

2. What is the width of the office?

3. What is the length of the classroom?

2. Which has a greater area: the classroom or the office?

ANSWER KEY

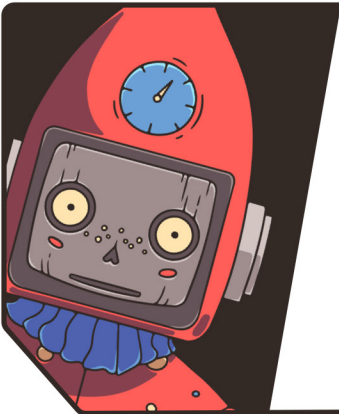

MULTIPLICATION

1. 24 pancakes worth of grease
2. 144 ounces of grease

FRACTIONS

1. $\frac{3}{4}$
2. Triangle
3. Circle and square
4. $1\frac{1}{2}$

PLACE VALUE

1. 1,074
2. 3,600
3. $<$ (less than)
4. 540
5. $200 + 40 + 5$

MEASUREMENT

1. 600 yd²
2. 10 ft
3. 8 yd
4. The classroom ($96 \text{ yd}^2 > 100 \text{ ft}^2$)
